# ActAmobile
remote employee check-in and attendance control

ActAmobile system is efficient, economical and modern solution for companies whose employees have working assignments at remote, periodical or temporary locations. This system is based on NFC technology, coupled with other technologies which are characteristic for devices for mobile communication.

- Employee checks in by drawing contactless smart ID card near to a NFC mobile device.

- Employee makes a photo and then photo, time of the registration, GPS location and employees ID info are sent to a ActA server, through a secured connection.

- Received data are processed and used in ActA system for time attendance records.
